

Better schools.

New jobs.

Protect our environment.

Better public transport.

VENSTRE
Putting people first

Venstre aims to give students the best opportunities for fulfilling their plans for the future.

We want schools where there is time to see each individual student and where there are high quality books and equipment.

Venstre will make public transport a viable alternative for people in Rogaland. We want more frequent services, more new routes and low prices. We see this as environmental policy in practice.

Opening up new business sectors is crucial to our economic future. Venstre will therefore make it easy and attractive to create new jobs in Rogaland.

Have a good election!

Regards Anja Berggård Endresen,
County mayor candidate

Venstre wants
better and
cheaper buses.

Kjartan Alexander Lunde
County leader and third-placed candidate

Promote education.

Venstre wants high quality schools, where pupils feel happy and achieve results.

Good teachers are the most important factor for good schools. Then we get schools that give equal opportunities to all.

Pupils should be seen, encouraged and get education according to their abilities. That's why Venstre will let teachers teach, and give them opportunities for professional development.

Venstre will:

- ✓ have more practical teaching in vocational education
- ✓ build more student accomodation
- ✓ make sure there are more apprenticeships
- ✓ offer good opportunities for professional development for teachers
- ✓ ensure easy access to health visitors at all schools

Venstre promote schools.

Make green choices.

It should be easiest and cheapest to choose the environmental friendly option.

Venstre will protect nature to secure a clean future for coming generations.

Venstre will:

- ✓ assist in the installation of quick-charging stations for electric vehicles throughout the county
- ✓ ensure access to pristine nature for all
- ✓ protect endangered species
- ✓ strengthen protection of agricultural land
- ✓ establish Pulpit Rock national park
- ✓ phase out the fur trade

Better public transport.

Traffic congestion is increasing in Rogaland, while the proportion of people using public transport is falling.

Venstre will boost bus and rail transport.

Venstre will:

- ✓ build double-track railway to Egersund and reopen the Ålgård line
- ✓ reduce the price of the youth travel pass to 300 kroner
- ✓ evaluate other forms of rail-based transport in North Jæren
- ✓ give a much-needed improvement to bus services in Haugalandet, and maintain boat routes to Ryfylke
- ✓ increase the tempo of cycle-route building
- ✓ double the number of bus departures on routes affected by rush traffic

New jobs.

Venstre will encourage businesses which create wealth and green growth.

International reports now show that Norway scores unnecessarily badly on innovation, creativity and entrepreneurship. The graphs are pointing the wrong way. Venstre will focus more on wealth creation and innovation.

Rogaland needs new jobs for a new era. Venstre will help create them.

Venstre will:

- ✓ make Rogaland a leader in environmental technology
- ✓ reduce red tape for business
- ✓ secure easier access to start-up capital for entrepreneurs
- ✓ contribute to the creation of new jobs
- ✓ strengthen Rogaland's position as a food county and encourage development in the food industry

Venstre will
create new wealth
and green growth.

Rogaland Venstre's candidates
